The SR-Editor has been designed using experience gained from the MR and SR series remote controls. Designed as a stand alone production Video Editor for use with multiple video formats. This low cost video editor can record on all machines simultaneously allowing the production of multiple format copies. Both Ampex and Sony protocols may be used simultaneously.

The Editor was developed to suit the requirements of a video production company with different user requirements so as to provide a flexible, tested, user friendly editor that meets the rigorous demands of a production environment.

MACRO KEYS

Any of the 50 user functions provided may be assigned to one of the 9 macro keys. The user functions include Dat specific functions such as PNO renumber, id write, id read. video specific commands such as assemble or insert, ADR keys (Next Loop, Prev Loop, Join, Insert), or system commands such as instant replay, instant record, Mark. Continual user feedback ensures that more functions are provided on a regular basis.
