

VM-15 HDMI/HDSDI Streamer and Punch Inserter

- Trigger from closures, pops, MIDI, LTC lists, or USB
 - Up to 4 simultaneous streamers
 - Rehearse, record, playback annunciators (text overlay)
 - Beeps output
 - Colored streamers and punches
 - Masking and mask transparency
 - Convert SDI to HDMI, HDMI to SDI
-

The VM-15 has jitter-free streamers, flexibility, features, and performance that no software-only solution can match.

The VM-15 is designed for ProTools stand-alone systems as well as SoundMaster or any other system that provides closures for PLAY status or triggers.

Automatic clock rate and input detection can switch between HD or SD, pulled down or not, SDI or HDMI, and the multiple formats of SMPTE 274, 259, and 296.

The SDI and HDMI outputs are both active with appropriate SDI or HDMI input formats.
